Supabase-Auth Activity

CS Elective 2 | Mobile App Development

Other Provider Authentication

1. Select 1 additional 3rd-party provider to use for your app's authentication.
2. You can choose from a handful of options provided by Supabase:
3. Integrate as additional authentication option for your users.

Submission

1. Create new branch on your current repo and name it backend-auth.
2. Push your output on this new branch.
3. Submit the branch link in the corresponding submission bin on Daigler.
